

MASLOSKI PEST SERVICES

Flea Preparation Checklist

Fleas can be difficult to control without teamwork. In order to ensure the satisfactory delivery of service, the Customer must cooperate in the preparation and follow-up of the rooms/areas to be serviced. MPS has prepared this checklist of things the customer needs to do prior to treatment. The Customer acknowledges that he/she has read and understands the preparation items as set out below and agrees to perform all preparations as required.

The Service will not be provided until the rooms are completely prepared as set out herein.

Preparations prior to arrival:

- Clear all carpeted floor (including closets) of boxes, clothing, toys, & any other items that will prevent treatment.
- Wash (in hot water) or destroy all pet bedding materials. If bedding material is discarded into the trash, put in a trash bag and remove to exterior trash container as soon as possible.
- Vacuum wood, tile, and vinyl flooring.
- Vacuum all carpeting and rugs.
- Vacuum pet sleeping and resting areas (under furniture, window sills, shelves, etc.)
- Vacuum furniture, especially between and under cushions.
- Empty vacuum cleaner contents into trash bag and remove to exterior trash container as soon as possible.
- Remove pets from home (prior to application). Store or cover all food. Cover fish tanks.
- Arrange to have pets treated the same day as the home. (This is very important!)
- You and your pets will need to stay out of the treated area during treatment as well as two hours after.

After treatment is complete:

- Do not clean carpet or floors with detergents or cleaners for at least two weeks. (detergents will neutralize the chemicals)
- Continue to vacuum daily for a week. (remove vacuum contents to exterior trash container each time)
- If infestation is severe it may be necessary to launder and dry clothing to remove fleas, eggs, pet hair.
- Repeat ALL preparations on the day prior to the follow-up treatment as well. This should be scheduled 14-21 days from initial treatment.

An exterior treatment may be necessary as well. Our technician can advise what best fits your needs.

Please do not hesitate to contact MPS at (715)338-8223 if you have any questions or need further instructions
